

 **PODARTIS**
clinically tested footwear

new collection
spring summer

2026

Artfully created.

Podartis specializes in the production of footwear, insoles, stockings, braces and materials for the prevention and treatment of the main walking pathologies such as hallux valgus, hammer toes, rheumatic foot, diabetic foot and post foot surgery.

The company's flagship product, the result of more than 30 years of research, is its cutting-edge solutions for the diabetic foot.

Every product made by the company is rigorously clinically tested to meet the highest quality standards in the sector and guarantee maximum protection and comfort.

Continuous product innovation has its source in a constant commitment to research, linked to medical-scientific comparisons and collaborations with some of the most authoritative international experts.

The patents that characterize Podartis products are direct evidence of the company's mission: to help people walk well to live better.

SS26

COLORS CONCEPT - SS COLLECTION 2026/2027

The color trends for Spring/Summer 2026 develop around two key concepts inspired by different approaches and responses to global challenges:

- A focus on sustainability and the richness of nature (“**save the planet**”).
- A meditative creative abstraction, to distance oneself from reality (“**head in the clouds**”).

SAVE THE PLANET

2026 is seen as a year of reorientation. More individuals will recognize the urgent need for change in managing all human activities to work together toward saving the planet. To promote the sustainability agenda, colors that reflect environmental themes and express versatility, stability, and longevity will be essential. The three “SAVE THE PLANET” colors listed below are key for the season and bring fresh energy and novelty to the Summer 2026 color palette.

Transformative teal: This blue-green shade is refreshing, calming, and energizing all at once, with a transformative and regenerative character. It’s the lead color of Spring/Summer 2026, inspired by the collective effort to find sustainable solutions for our planet’s future. (Articles: Angel/Aida/Zea Teal Green).

Amber yellow: With a slightly unusual and captivating charm, this amber yellow is appealing in a world dominated by screens. It encourages slowing down and appreciating the regenerative power of a material long considered a marvel of nature. It also extends to more earthy tones (ochre and hazelnut), emphasizing nature’s longevity and eternity. (Articles: Melody Met Yellow, Grace/Belen Nautical Nut).

Olive green: A very Mediterranean tone, olive green has dominated high fashion runways and remains a key color for Spring/Summer 2026. It evokes images of forests, olive groves, and gardens, creating a connection with nature and a sense of calm and rejuvenation. In its darker shades, it symbolizes wisdom, well-being, and sustainability. (Articles: Alipes Tasmania Olive, Romina Country Olive, POD-X W Dark Olive, Via Olive Green).

SS26

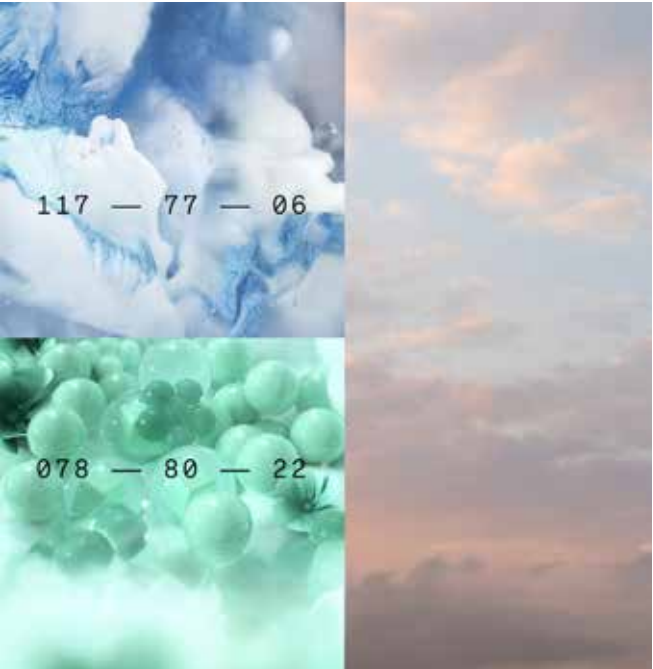

COLORS CONCEPT - SS COLLECTION 2026/2027

HEAD IN THE CLOUDS

The metaphor “head in the clouds” commonly describes someone who is distracted, dreamy, or lost in thought, as if their mind escapes everyday reality to wander through an imaginary world of dreams and reflection.

It also carries a poetic undertone: clouds—elements of the sky—are often associated with lightness, freedom, and vastness. They represent a creative space and a safe vantage point from which to observe our dizzying future. This is the main theme for Summer 2026, fully expressed in the article Romina Aquarelle Sunsky, and reflected in three pastel colors inspired by summer sunsets.

Jelly mint: A lively and youthful shade, nostalgic and playful, fitting into the “Glimmers” theme—micro-moments of joy that help reshape our thinking, boost calm, build resilience, and improve mental health. (Articles: Monica Maui Mint, Alipes Brillè Mint, Alisun Vision Ice Green).

Flexi pink: This inclusive and nuanced shade has a synthetic vibe that blends lilac and pink. It draws inspiration from technology and the love/hate duality many of us experience with digital media and the online world. (Articles: Grace Nautical Light Pink, Alisun/Susan/Zea Nacrè Light Pink, Monica Maui Nude Pink).

Blue aura: A “sky” shade with a relaxing yet modern personality. This serene blue with grey undertones has a healing vibe, as its name suggests—linked to light and shadow. Blue Aura is unisex and trans-seasonal. It is cozy and enveloping, yet futuristic and representative of digital aesthetics. (Articles: Alisun Nacrè Light Sky, Cloe/Jasmine Bloom Denim Blue).

PODARTIS VEGAN

Today, vegan shoes are not only an ethical choice, but also a fashion and lifestyle choice for many people of all ages. With growing awareness of the importance of sustainability, more and more consumers are opting for cruelty-free and environmentally friendly products. According to a recent Environmental Profit & Loss sustainability report from a major global fashion group, vegan leather has only one-third the environmental impact compared to real leather. *So is vegan leather good for the environment?* The obvious advantage of vegan leather is that it does not rely on livestock at all, which not only kills animals but also involves deforestation and the impact this has on the natural habitats of wild animals.

For Podartis, another key aspect of every Vegan item is to ensure a 100% hypoallergenic product. In light of all these important factors, the Vegan range is further strengthened this season across all product segments:

In the Women's Vegan S/S 2026 range, we have 10 items in the Deambulo line (3 **Via**, 3 **Deambulo Sport**, 2 **Jane**, 2 **Fly**), and full 17 options in the Activity line (**Zephyr**, **Saturn-X**, **Pod-X**). In the Men's Vegan S/S 2026 range, we have 2 slippers (**Ruben**) in the Classic line, a full 14 models in the Activity line (**Hero DCS**, **Saturn-X**, **Pod-X**), and 2 items in the Deambulo line (**Deambulo L**).

PODARTIS GOES GREEN

In a time of great uncertainty and complexity, the choice of sustainable materials in the collection takes center stage. Using green materials is an ethical and committed choice towards consumers and the environment, in light of the ongoing climate changes. Here are the main sustainability steps present in the collection:

- We use leathers from LWG GOLD certified tanneries. The LWG certification is a mark of quality for companies operating in the leather industry. It recognizes businesses that manage their environmental impact and pursue sustainable economics through a systemic approach. This environmental audit protocol was developed by leather brands and producers with input from NGOs such as WWF and Greenpeace. It is regularly updated to stay relevant and meet the evolving needs of the industry.
- We use raw materials from suppliers who rely 100% on green energy sources.

- We use eco-leathers from companies that are members of the SEAQUAL INITIATIVE community—a group of people, organizations, and companies working together to clean up our oceans, raise awareness about marine litter, and support those combating it.

We purchase stretch fabrics from companies recognized and awarded within the “Carbon Footprint Registry, Compensation, and CO2 Absorption Projects” program. This initiative, supported by European Ministries for Ecological Transition, emphasizes minimizing environmental impact and ultimately achieving carbon neutrality in production processes.

- All **Fancy** and **Ginger** items in the sample collection (6 items total) feature stretch fabrics made from recycled polyester yarns certified by GRS (Global Recycled Standard). The use of recycled yarn promotes circular economy practices and significantly reduces greenhouse gas emissions in production cycles.

NEW TECHNICAL CONCEPTS

The DCS Lite is a fiberglass insert placed inside the high-density EVA Piuma Podartis sole.

D-lite technology provides:

- Elastic response that facilitates stride
- Control of excess pronation and supination
- Increased propulsive phase thrust
- Controlled semi-rigidity

The D-lite sole is suitable for those who need protection and stability while walking.

LINEA MODULA

Features

The Modula line has always been one of the market's benchmarks for elegance and technicality.

Podartis **Seamless Technology** reduces the presence of seams on the inside of the product to reduce painful chafing and ensure maximum protection.

SEAMLESS TECHNOLOGY

Less seams. Less pain.

FLEXPELL®

Self-moldable upper.

STYLE

Elegant lined wedge.

The only self-modeling ones.

Width
10

Biomechanical outsole
FLEXIBLE

The biomechanical outsole protects the joints during the steps and ensures an even redistribution of pressure.

The Modula footbed is made of an EVA+PU compound that guarantees continuous cushioning of the step and effective protection over time. Moreover, it is well housed inside the sole hull thanks to the Velcro system that guarantees a high product quality.

The M width, combined with the products' self-modelling properties, make it ideal for rheumatic patients who are sensitive to the refined aesthetic taste of Modula products.

Outsole focus

- Biomechanical rocker / protects the joints
- 20 Mm heel / correct posture

SANDY LINE

Features

The Sandy line focuses on maximum functionality, adapting to each patient's foot.

Podartis **Seamless Technology** reduces the presence of visible seams on the inside of the product to avoid painful chafing and ensure maximum protection. All liners feature high-density materials for improved comfort and have Dermocompatible Lycra® in the foot contact layer.

SEAMLESS TECHNOLOGY
Less seams. Less pain.

FLEXPELL®
Self-moldable upper.

Width
10,5

Biomechanical outsole
FLEXIBLE

The new Sandy Biomechanical outsole provides greater protection for the foot's joints during gait phases and guarantees a highperformance redistribution of pressure.

The physiological 20mm heel ensures correct patient posture.

The high-density Eva + PU compound of the Sandy footbed ensures continuous cushioning of the step and effective protection especially for rheumatic patients. Dermocompatible microfibre cover.

The 10.5 width, combined with the self-modelling of the products, guarantees an excellent fit even for the most demanding feet.

The only self-modeling ones.

Outsole focus

- Biomechanical rocker / protects the joints
- 20 Mm heel / correct posture

ASOLO LINE

Features

The Asolo Line is a technical and stylistic evolution of the Modula Line.

The new biomechanical Asolo sole with large non-slip sole, the refined materials and the XL width make it ideal for the most demanding customers.

SEAMLESS TECHNOLOGY
Less seams. Less pain.

FLEXPELL®
Self-moldable upper.

Width
11

Biomechanical outsole
SEMIRIGID

The sole is dual density to ensure cushioning and grip while walking. Semi-rigid at 40% to reduce joint stress and facilitate the biomechanics of walking, while the 25 mm heel allows for better posture.

The technical principles of self-moldable and seamless lining make it ideal for the most sensitive feet and for accommodating even major deformities.

The Asolo footbed is made of PU+EVA to ensure effective cushioning and comfort over time.

Less seams. Less pain.

Outsole focus

- Shock-absorbing areas / high resistance
- 25 Mm heel / better posture

SUPER LIGHT / WELLWALK LINE

Features

Extremely light sole, with stabilizing insert in composite fiber.

Innovative design combined with the most classic of biomechanical constructions.

SEAMLESS TECHNOLOGY
Less seams. Less pain.

FLEXPELL®
Self-moldable upper.

Less seams. Less pain.

Width
12-13,5

Biomechanical outsole
SEMIRIGID

The Timing Rocker® Podartis sole in micro workable with 20mm heel is semi-rigid to 70% and reduces the energy demand for the step, ensuring a smooth transition between the moment of contact and propulsion.

Ideal for dynamic people who love to experience the urban context. Also ideal for diabetic or rheumatic patients at risk 2.

Seamless Podartis Technology reduces the presence of visible seams inside of the product to avoid painful chafing and ensure maximum protection. All inner liners feature high density materials for a better comfort.

The choice of WIDTH 12-13,5 allows to accommodate even the feet with important deformities.

Outsole focus

- Timing rocker / biomechanical outsole with micro
- Support structure / 330 km / m³ density
- Heel / pod50 density 240kg / m³ shore a 50

STEP INTO THE X DIMENSION

From Podartis research,
the only clinically tested therapeutic shoe
for physical activity.

NEW POD-X

POD-X shoes are designed to provide **maximum comfort, stability, and performance** while walking. They represent the pinnacle of technology and design, with an innovative sole that is the result of Podartis research in biomechanics and personal well-being.

Here are some key features that make them ideal for Adapted Physical Activity:

- **Breathable materials:** use fabrics that allow air circulation, keeping feet dry and cool.
- **Advanced cushioning:** equipped with semi-rigid outsole with D-lite insert, provides effective cushioning to absorb impacts and reduce plantar pressures.
- **Stabilizer system:** the special shape of the sole in the rearfoot combined with the lateral Stabilizer system provides outstanding stability and prone-supination control.
- **Optimal grip:** outsoles designed with treads with rubber inserts to provide secure grip on different surfaces, preventing slips and falls.
- **Safety in every step:** the large support surface evenly distributes pressure and increases stability, promoting natural posture.
- **Lightweight:** built with lightweight materials that allow smooth and effortless movements, reducing fatigue.
- **Protection:** D-lite technology provides an elastic response that eases stride. Timing Rocker® outsole complements semi-rigidity control for total protection while walking.

POD - X DARK BLUE PA38770

SIZE RANGE: 35-48 UNISEX / WIDTH: 11
OUTSOLE: Semirigid
Airmesh upper + tecnofilm

DEAMBULO LINE

Features

Classic line, elegant and light, best seller in shops, appreciated for its extreme comfort.

The sole is biomechanical to reduce joint stress and rebalance pressure peaks.

- Ideal for rheumatic and diabetic patients in risk class 1.

Width
11-12

Biomechanical outsole
FLEXIBLE

The 12 width makes them particularly suitable for feet that also need custom-made insoles with a significant thickness.

The Flexpell has a sandwich structure with a waterproof outer layer, a self-modelling intermediate layer with open cells that guarantees microcirculation of air and an inner layer in dermocompatible Lycra.

All models are self-modelling and the linings are made with seamless technology to contain slight deformities and grippy fingers.

Rheumatics and diabetics.

Outsole focus

- Flexible timing rocker® / anti-slip pads
- Tread / high abrasion resistance polyurethane

CLASSIC / CASUAL LINE

Features

The Classic Line for Men has always been one of Podartis' cornerstones to offer an elegant product for the business man combining technicality and functionality of the products.

- Shock-absorbing heel
- Vibram tread
- High abrasion resistance

Width
11-12

Biomechanical outsole
SEMIRIGID

The Timing Rocker® Podartis micromachined outsole is 70 percent semi-rigid and reduces the energy demand for stride, ensuring a smooth transition between the moment of contact and propulsion.

Ideal for juniors - seniors over 55, with reduced joint mobility and progressive bone decalcification. Particularly suitable for patients with diabetes or rheumatics in risk grade 2. To increase the performance of efficacy and protection, the use of treads among the best performing in terms of abrasion resistance and cushioning developed **in collaboration with Vibram**.

Podartis Seamless technology reduces the presence of visible seams inside the product to avoid painful chafing and ensure maximum protection. All inner linings feature high density for added comfort.

The choice of socks also accommodates feet with deformities major deformities, fully responding to all degrees of risk provided by the **International Diabetic and Rheumatic Triage**.

Shock-absorbing heel.

Outsole focus

- Timing rocker / biomechanical outsole with micro
- Support structure / density 330km / m3
- Heel / pod50 density 240kg / m3 shore to 50
